When you reach your retirement date, your pension pot will be invested 100% in the Legal & General (PMC) Retirement Income Multi-Asset Fund 3.

Please remember that the value of investments can go down as well as up. It's particularly important to remember this if you are close to taking your benefits.

WHAT ARE THE AIMS OF THIS LIFESTYLE PROFILE?

This lifestyle profile is designed for members who intend to leave their pension pot invested beyond their retirement date, with the intention of taking an income (often referred to as flexi-access drawdown or income drawdown).

It's an investment strategy that offers you the potential to grow your pension pot prior to your retirement date. As you get closer to retirement your pension pot is gradually moved into a fund which is suitable for members who want to use it to provide an income in retirement.

Once you reach your retirement date automatic switching will stop.

The final investment choice may not be suitable if you don't take pension benefits as intended from your retirement date. It's important that you review your retirement date on a regular basis, as it will determine where your pension pot is invested as you approach retirement.

It's important to review your investment strategy on a regular basis, after your retirement date, to ensure that the funds in which your pension pot is invested remain suitable for your needs.

Please be aware that if you intend to use flexi-access drawdown or income drawdown, the amount of pension income you might receive is not guaranteed.

WHAT ARE THE ADVANTAGES AND DISADVANTAGES OF A LIFESTYLE PROFILE?

ADVANTAGES	DISADVANTAGES
You don't have to choose which fund(s) to invest in as the funds are set in the lifestyle profile.	You are not choosing where to invest. There may be another investment fund or lifestyle profile more suitable to your needs.
Lifestyle profiles are designed to reduce investment volatility or to target a specific objective as you approach your retirement date.	A lifestyle profile doesn't guarantee the value of your pension fund. The value of investments can go down as well as up.
Your money is automatically switched for you as you near your retirement date.	You do not choose when to change your investment as it is set by the lifestyle profile.
The automatic switching ensures that your money is not moved in one go at a time when the markets are low.	The timing of switches is automatic and happens at fixed times. They don't take market conditions into account which means you may miss out on growth in the market.
The final investment holding is designed for a particular outcome. For example, taking all of your pension pot as cash, buying an annuity, or taking withdrawals directly from your pension pot.	The aim of the lifestyle profile may not match the way you intend to use your pension pot or reflect your attitude to risk. It may also be unsuitable if you don't take pension benefits as intended at your retirement date. In this case, you should review where your pension pot is invested and whether this remains suitable for your needs.

You can move your pension pot between investment funds at any time. You can also change your retirement date and invest for longer to allow more time for your fund to grow. If you decide to invest in a lifestyle profile please be aware that you can only choose one profile. It's also not possible to invest in any other funds at the same time.

Lifestyle profiles are not risk free. You can find more detail about the risks associated with the funds in this lifestyle profile in our fund factsheets.
